**Implementation of Requirements under the REACH Directive (EC) No. 1907/2006 of the European Parliament and Council dated 18 December 2006**

Ladies and gentlemen,

Thank you for your enquiry regarding compliance with the REACH directive. Our position is as follows:

For the purpose of the REACH directive, we consider ourselves a downstream user which puts us in the same position as our customers. We use several chemical substances in our production processes, but we do not manufacture nor modify any chemicals. The obligation to pre-register and register substances applies solely to the manufacturers and importers of substances.

As a downstream user, we will of course comply with all requirements imposed on us by the REACH directive. In particular, we maintain close contact with our suppliers in order to ensure that the registration process is observed for the substances purchased by us.

Based on feedback we have received to date, we believe that we will be able to continue supplying our products without any changes.

Please do not hesitate to contact our quality assurance department if you have any further questions about REACH in our company.

Yours sincerely,

Roto Frank AG
