New Deceuninck Slider24 Sliding Door Hardware Sets

Fabricators and installers expect top quality and performance as standard from Deceuninck's products, and they won't be disappointed with the new Slider24 sliding door system that benefits from the best hardware available.

As Deceuninck's hardware partner, VBH have put together Standard and Platinum Security hardware sets for the system. The Platinum Security set has achieved a pass at PAS24:2012 (Enhanced security requirements in doorsets and windows).

Both specs include the excellent Yale stainless steel lock that features no less than 6 solid steel locking hooks. The lock can also be fitted with a vertical shootbolt at the head to provide a ventilation position (Standard set only).

The profile cylinder in the Standard set is the popular greenteQ Gamma 6 pin anti-drill/anti pick, while the Platinum Security set utilises the Yale Platinum AS 3 star product. This is tested to the rigorous

TS007 Kitemark security standard, achieving a 3-Star rating. Platinum AS provides anti-snap/anti-bump/anti-drill/ anti-pick/anti-extract protection. This is all achieved through features such as a sacrificial snap-off front section, hardened grip-deflectors, a hardened flexible reinforced bar, and an interlocking cam to provide additional protection and strength.

Both the greenteQ and Yale cylinders come with a 10 year guarantee.

The doors are operated by greenteQ Alpha patio pull handles. As part of the greenteQ Suite, these handles are available in six attractive finishes, enabling the fabricator or installer to perfectly colour match with any greenteQ resi-door handles, outward opening window handles or tilt & turn handles on the same installation.

Ordering details for both sets can be found overleaf.
