Glazpart Standard & Coloured Vents

Link-Vent Ventilator Range

Glazpart Link-Vent is a new ventilator that offers exceptional air flow through a compact size thanks to the design of the external canopy and internal opening flap.

The innovative 'link' allows the flap to be positioned to reduce draughts by directing air away from the occupants without reducing the air flow.

Available in two sizes, Link-Vent meets the requirements of Building Regulations Approved Document F1. Size 2500 EQA delivers similar performance to a traditional 4000mm² (free area) vent even though it is only the size of a traditional 2000mm² product. 5000 EQA delivers significantly more EQA performance than a 4000mm² vent. The 5000 EQA Link-Vent features a split internal flap for added comfort and ease of use.

Link-Vent is available in Screw fix or Clip fix variants. Screw fix can be used on PVCu, aluminium and timber windows. The rounded ends allow the vent to be rebated into timber frames if required. Clip fix vents are a good option for PVCu and aluminium windows, speeding up the fitting process as no screws are required.

Link-Vent is available in all the usual finishes (white, brown, tan and black) but can also be supplied in five woodgrain finishes and a host

of colours including Chartwell Green, Anthracite and Slate Grey and Cream. There is also the option to spray vents in any RAL colour to special order. With the increasing popularity of woodgrain and coloured profiles this is a real benefit to the window manufacturer, specifier and installer (not to mention the home-owner) as it allows the vent to blend in fully with the frame material.

Benefits at a glance:

- Meets requirements of Approved Document F1
- Superior air flow with reduced vent size
- 2500 and 5000 EQA sizes (5000 EQA flap is split for additional comfort)
- Compact size means minimal routing of frame
- Versatile inner flap allows air to be directed up or downwards
- Screw fix or Clip fix installation
- Rounded ends look good and allow vent to be rebated into timber frames
- Over 20 standard colour options including 5 woodgrain finishes
- Available sprayed in any RAL colour to special order
