## Hoppe Complementary Range

### Hoppe Complementary Range

Hoppe has recently introduced the Complementary range of letterboxes, knockers, numerals and letters to provide an exact colour match to its existing door handles.

The knockers are available in two styles; a Traditional Urn and the more contemporary Designer, both of which are available with or without a door viewer. All knockers are face-fix to speed up installation.

The 12" letterbox is of a modern design, with similar lines to the Designer knocker. The sprung flaps open to 180°, with a positive return action, and feature a finger recess for easy opening. The box is fully weather sealed, with an external nylon brush to reduce air ingress. Each box is supplied with two sets of through-fixing screws, making it ideal for fitting to a 44mm door slab or 70mm mid-rail.

The numerals are available in '0' – '8' ('6' doubles up as '9') and letters are available from 'a' – 'd' in lower case only.

All products are individually packed and are available in white, black, polished chrome and polished brass. They have been salt spray tested to 480 hours (BS EN1670 Class 5).

Each product is covered by Hoppe's 10 year mechanical and surface finish guarantees.

Further details regarding testing and certification are available upon request.

#### Benefits at a glance:

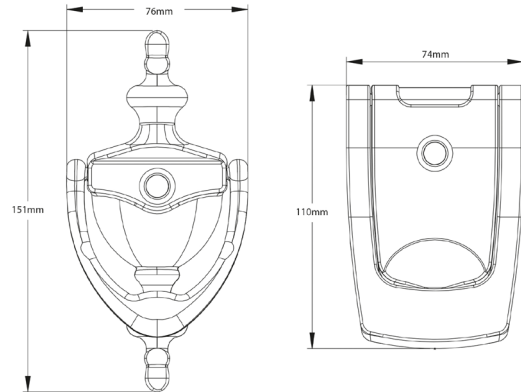

- Elegant designs
- Salt spray tested to 480 hours
- Finishes suite with popular Atlanta and Birmingham handles
- Hoppe 10 Year Mechanical and Surface Guarantee

VBH codes can be found overleaf.
