## Maco M-SPAG Solution for Veka French Casement Windows

### French Window Solution

#### Maco M-SPAG Solution for Veka French Casement Windows

Maco have developed a solution for French windows made using Veka's Micro Mullion system.

The solution utilises M-SPAG 22BS gearboxes and pairs of croppable extensions, all with and without mushroom cams. The extensions feature double mushroom cam locking points (twin cams) to achieve night vent in the single position striker plates

It is important to note that the central mushroom striker plate, that lines up with the gearbox, is different to those that line up with the extensions.

VBH item codes can be found in the table below:

Description	VBH Code	SRH Range 600 - 800mm	SRH Range 801 - 999mm	SRH Range 1000 - 1100mm	SRH Range 1101 - 1400mm
