M-SPAG Telescopic Shootbolt

Maco M-SPAG Telescopic Window Shootbolt

Maco's latest outward opening window shootbolt, the M-SPAG, is designed with ease of fitting, easy stocking, security and longevity in mind.

M-SPAG is telescopic, with just 5 main sizes*, and all fixings are applied from one direction. This makes it quick and easy to fit as the window needs less handling, the quantity of parts required per sash is reduced, and there is no need to crop any hardware to size. This has a knock-on benefit of cutting out waste caused by mis-measuring. M-SPAG is supplied in Maco's new M-PACK packaging, which is designed to increase box stability and access to the product when on the work bench.

The sliding elements are streamlined and made from silver-look plated steel to give the installed M-SPAG a neat finish.

The steel shootbolt ends hint at the product's strength in use. M-SPAG is fully tested to exceed the current required standards and is approved under the MACO Secure Plus guarantee scheme.

*sashes from 320-500mm can be geared using the M-SPAG Size 0 gearbox with 2 extensions featuring cast shoot ends

Benefits at a glance:

- Telescopic product for easy handling & quick, accurate fitting
- Reduced stock-holding through 5 telescopic sizes & 1 croppable size
- M-PACK packaging
- Exceeds current security requirements
- Approved under MACO Secure Plus guarantee scheme
- Streamlined system for neat installed finish
- Silver-look surface treatment tested to 480 hours neutral salt spray test
- 320 – 1500mm application range
- Fits standard & French casement windows
- Works with Maco centre locks on tall top hung sashes
- Can be fitted with handle offset to bottom in hard to reach installations
- Utilises standard Maco mushroom, shootbolt & Combi-Strikers
- 10 year product warranty from Maco

Simply everything.

Everything simple.
