Siegenia-Aubi Patio Handles

Si-Line TL/PZ Internal/External Patio Door Handles

VBH stocks the Siegenia-Aubi Si-Line TL/PZ patio door handle for doors fitted with lockable tilt & turn drive gears. This combination allows for an internal/external handle option.

The product has a standard inner lever with a slim outer, making it ideal for use on bi-fold doors (e.g. Siegenia-Aubi FS Portal PLUS) and also manually operated tilt/slide patio doors (e.g. Siegenia-Aubi PSK PLUS 160). Although the handle is designed for these systems, it is also compatible with many other hardware brands.

Each set is supplied complete with inner and outer levers, and also a pair of Euro-profile cylinder escutcheons.

A separate spindle/screw set should also be ordered. These vary according to the thickness of the sash profile being used.

The handle set is available in 5 colour options and with 3 spindle/screw set options.

VBH codes are listed in the table below:

Description	VBH Code	Box Qty
