New Siegenia Tilt/Slide

Siegenia-Aubi PSK PLUS 160 Tilt/Slide Patio Hardware

Siegenia-Aubi have introduced a new tilt/slide patio hardware system, known as PSK 160 PLUS, to replace the previous PSK 160 product.

The new, improved, system includes smaller diameter wheels in the roller assembly, leading to a reduced height bottom track. This means the dimension from the frame rebate to the bottom of the track is reduced from 44mm to just 35mm. PSK PLUS 160 is available in white, brown and silver.

PSK PLUS 160 features S-ES corner drives on all 4 corners. The mushrooms on the bottom corners locate into S-ES tilt strikers to provide the tilt function, whilst those on the top corners locate into standard roller striker plates on the vertical jambs. These strikers can be replaced with S-ES mushroom strikers, if desired, to provide additional security, meaning there is no need for separate standard and security basic cartons.

Important note - it is not possible to combine wheels from the old system with tracks from the new and vice-versa.

A new order matrix can be found overleaf listing the new VBH code numbers.
