Yale Conexis L1 Smart Lock

Yale Conexis L1 Smart Lock

The Conexis Smart Lock from Yale is the clever way to access and protect your home.

It's a keyless product so say goodbye to compromising your home security by leaving a key with a neighbour or 'under the mat', and forget all about the hassle of replacing a lost key. Everything is done electronically in a number of ways.

The user can use the key card or key tag supplied with the unit, or attach a phone tag to their phone. Alternatively download the secure Bluetooth Twist & Go app to a smartphone to use the phone as a 'mobile key'. The app has the added benefit of letting the user monitor who comes and goes, and can send a notification informing the user when 'key-holders' get home.

The app can also send a mobile key to family and friends' smartphones so they can access the home wherever the main user is. No more children waiting in the rain when they've mislaid their key. The validity period can be set to give access for a few hours or a few weeks.

The app can also be used to revoke the mobile keys, tags and cards at any time. The user has total control at all times.

Twist & Go works by simply touching the phone against the Conexis unit to activate the Bluetooth function, and then twist the handset through 90° to unlock the door. The app is currently available for iPhone and android.

There is no wiring; power is provided by 4 AA batteries. Under normal circumstances these will last for up to a year and the lock will give plenty of warning when they're running low. If the user does allow them to go flat, temporary power can be achieved by connecting a 9V battery into the concealed port.

If Conexis is tampered with from the outside it emits a loud alarm to deter potential intruders.

Safety and security is addressed on the inside of the door by a secure push and turn thumb-turn. Conexis is PAS24 compliant.

Conexis L1 is available in attractive satin chrome, polished chrome and polished gold finishes and can be used with most multi-point locks currently on the market.

Yale Conexis L1 Smart Lock
