## greenteQ Alpha Handle Blister Pack

### Espagnolette Window Handle in Retail-Friendly Packaging

We now offer the popular greenteQ Alpha espagnolette handle in eye catching retail-friendly packaging.

The inline white locking handle is supplied complete with M5 x 50mm fixing screws, key and cover cap. The 45mm spindle will fit many profiles as standard and is notched in 4 places to allow easy cutting to shorter lengths if required.

Each handle is individually presented in an attractive blister pack so is ideal for displaying in a trade counter, showroom, hardware store, or retail website.

Easy to follow fitting instructions are included. These are worded to make it easy for any member of the general public to replace his own handle in future. This makes it an ideal item for a repair professional to offer as an additional sale once he has visited to fix another item (a door for example), thus maximising the revenue generated by any site visit.

#### Benefits at a glance

- Adds additional value to all call outs
- Generates repeat business
- Your customer can choose a 'supply only' or 'supply and fit' option
- Easy to follow instructions make it simple for the general public to fit the handle, encouraging them to buy
- Attractive retail packaging
- One handle fits all
- Spindle notched to aid cutting if required
