greenteQ Professional Measuring Tapes

The greenteQ Professional metric measuring tape is an excellent tool for the factory or on site. Its reinforced blade helps resist bending and the rubber coated impact-resistant ABS housing makes it hard-wearing and comfortable to use.

The tape locks out automatically, and 2 release buttons (for finger or thumb operation) make it easy to control in any position.

The stainless steel hook is flexible, ensuring accurate measurements whether hooked over the end of an item or pressed against an object to measure a space. The tape corresponds to Class II of the EU Weights & Measures standard.

Each tape is fitted with a flexible steel belt clip so it's always there, ready to use.

greenteQ Professional measuring tapes are available in 3m, 5m and 8m lengths, with sturdy 16mm, 19mm and 25mm respective tape widths. The robust spring allows good control as the tape is retracted, avoiding snap-back.

Each tape is supplied in attractive point of sale packaging so is ideal for selling on.

Benefits at a glance:

- Class II accuracy
- Sturdy steel tape resists bending
- Flexible hook and clear markings for accurate readings
- Twin release buttons and robust spring for added control
- Rubber coated ABS housing protects unit if dropped

Size	VBH Code	Box Qty
3m Long/16mm Tape Width	3TLS0110	12
5m Long/19mm Tape Width	3TLS0111	12
8m Long/25mm Tape Width	3TLS0112	12
